Fax: +86-21-64042268

For registration, preliminary agenda, exhibition and co-sponsorship, hotel, visa application and other information, visit [www.CRO-china.org](http://www.CRO-china.org)

Fudan University, Shanghai, China, will host the non-profit conference along with other co-sponsors including the American Association of Pharmaceutical Scientists (AAPS). The attendees are expected mainly from pharmaceuticals in and outside China, and some from Universities, Research Institutes, Government and VC firms. The purposes of the conference are (1) to bridge pharmaceutical CRO and CMO industries in developed countries to their counterparts in China, including preclinical CRO services, CMO services, clinical trial services, candidate drug incensing-in and -out, as well as technology transferring-in and -out; (2) to elucidate pharmaceutical regulations in China in comparison with the Western standards, current status of intellectual property protection and enforcement; and (3) to exhibit modern pharmaceutical technology implementation in Chinese CRO and CMO services, involvement of universities in non-GLP services; The organizer wishes the conference attendees would reach as many contract agreements as they can. Therefore, extra networking time is set for this propose, including local site visits to these companies.

This is a non-profit, education and business combined conference. Therefore, the registration fees are low: \$500, for non-profit organizations (University, Governments, and Research Institutes); \$750, for industries; \$85, for postdoc.

The place of the conference is located in Drug Valley, Shanghai, where hundreds of Chinese and international biotech and pharmaceutical companies locate in. Attendees will have opportunities to discuss their R&D fruits, exchange ideas and build network. Local touring will be organized as well.
