New Drug Discovery in China 2013

April 21, 2013 (9:00 AM-4:00 PM)

**Illinois Institute of Technology, McCormick Tribune Campus Center
3201 S. State St, Chicago, IL 60616**

Featured Speakers

The “New Drug Discovery in China” conference will provide a forum for R&D leaders of major Chinese and American pharmaceutical companies to share their successes and challenges in drug discovery. This event will be a valuable opportunity for learning amongst professionals, academicians and students in the Midwest area of USA. This conference will also serve as a platform to foster the interactions and communications among pharmaceutical professionals from Chicago, Indianapolis, Cincinnati, Columbus and other cities in the vicinity. As globalization of pharmaceutical industry continues, R&D is gaining momentum in emerging markets such as China. Better insight of new drug discovery in China is highly important to US pharma companies for their market strategy and potential collaborations. This conference will aim at providing an update on the scope and status of drug development in China, as well as a juncture for US-based professionals to find career development opportunities in both US and China.

Biosimilars: Making Expensive Biologics Accessible to Patients Worldwide
