

Executive Director/ Senior Director of Analytical R&D

Qualifications:

PhD degree in Analytical Chemistry or equivalent with 5~10+ years industrial experience in small molecule pharmaceutical analysis - all aspects of drug substance and/or drug product analysis and characterization.

Responsibilities:

The incumbent is responsible for leading analytical and/or stability services programs and providing support to API development, and/or formulation development, API and/or clinical trial material manufacturing. The candidate should have extensive scientific/technical expertise and experience in API or drug product development (e.g. analytical development for API or/and formulated products, stability study, ICH guidelines, CMC & regulatory filing, and GMP compliance) appropriate for the level of decision making the job requires.
