

**Executive Director/Senior Director/Director, Analytical Research and Development (2)**

Qualifications: PhD degree in Analytical Chemistry or equivalent with a minimum of 5, 7, 10 or more years of industrial experience respectively in small molecule pharmaceutical analysis - all aspects of drug substance and drug product analysis and characterization, and or experience with late phase registration stability programs for global filing. Proven experience in bringing new pharmaceutical products from inception to product registration.

Responsibilities: The incumbent is responsible for analytical research and development activities interacting with other functions such as Process R&D, formulation development and Quality Assurance. The candidate should have extensive scientific/technical expertise and experience in API or drug product development (e.g. analytical development for API or/and formulated products, stability study, ICH guidelines, CMC & regulatory filing, and GMP compliance) appropriate for the level of decision making the job requires. Experience with registration stability programs for global filling is preferred for 1 senior management position.
