

Intelligent Drug Design Discovery and Development or ID4Pharma (ID4, www.ID4Pharma.com) is a startup company with an established artificial intelligent drug discovery-driven technology platform and new drug discovery patents. It recently received a major funding award to conduct FDA IND-enabling studies of target-specific novel anti-cancer drug towards Investigational New Drug (IND) and then New Drug Application (NDA) in the US and worldwide. ID4 is expanding into new and exciting areas and creating job opportunities for the following position:

Senior Scientist (job code: ID4Job-SS). Applicant should have 3~5 years of translational drug development working-experience in **medicinal chemistry drug design synthesis**, or **pharmacology /toxicology**, or **PK bioavailability**. Applicant should have solid working experience to prepare/review preclinical and/or clinical scientific data summaries. Experience with preparing FDA IND regulatory documents, New Drug Application (NDA), and/or Common Technical Documents (CTD) to meet with FDA and ICH guidelines and electronic submissions guidelines is a plus.

Application Process: Please send a resume, cover letter and three references to contact@ID4Pharma.com. Tel: 832-755-1077. Email subject: "ID4Job-SS"
